

# Car Line Logo

## THIS PACKAGE INCLUDES:

- 1 EPS file
- 1 Adobe Illustrator CS4 or above file
- 1 Photoshop file
- This help PDF file

## FONT USED:

- This logo uses the EXO free font, that you can download here:  
<http://www.fontsquirrel.com/fonts/exo>

## 1. EPS FILE

Inside each folder, you will find the following file:

- **Car Line Logo.eps**

In this file you will find all the logos organized as shown in the picture on the left. All text is editable. To change it you should open the eps on a vector drawing software like Adobe Illustrator, Corel Draw, Freehand, etc....

## 2. ADOBE ILLUSTRATOR FILE

Inside each folder, you will find the following file:

- **Car Line Logo.ai**

In this file you will find all the logos organized as shown in the picture on the top left. All text is editable. The logos are organized in the following layers (see picture on the left):

- **Primary Logo:** This is where the primary logos are; Use them when your background is Dark.
- **Positive:** This is where the positive logo versions are. Use them when your background is light.
- **Guideline:** This is where the background text is;

To edit the text just double click on it. It is grouped with its corresponding symbol. You can easily change the logo color, by clicking the swatch color and changing its value. It will automatically update all the logo versions of the file you are editing.

## 3. PHOTOSHOP FILE

Inside each folder, you will find the following file:

- **Car Line Logo.psd**

The photoshop file is built with editable text and smart vector objects, so you can scale the logo as you want and it will not loose quality. In this file you will find all the logos organized as shown in the picture on the left. All text is editable. The logos are organized in the following layers (see picture on the left):

- **Primary Logo:** This is where the primary logos are. Inside it you have:
  - **Main:** This is where the main logo is;
  - **Greyscale:** This is where the greyscale logo version is. Use it whenever a full colour reproduction is not possible.
  - **1 Color:** This is where the 1 color logo is. Use it whenever a full colour reproduction is not possible.
- **Positive:** This is where the positive logo versions are. Use then when your background is light. Inside it you have:
  - **Main:** This is where the main logo is;
  - **Greyscale:** This is where the greyscale logo version is. Use it whenever a full colour reproduction is not possible.
  - **1 Color:** This is where the 1 color logo is. Use it whenever a full colour reproduction is not possible.
- **Guideline:** This is where the background text is;

To edit the text just double click on it.

You can easily identify the text layer - it has the big "T" on it ;)

You can easily change the logo color, by clicking the "fx" symbol and changing the color overlay.

*I hope you enjoy using this template. Please, don't forget to rate it!*

*If you have any questions or suggestions, please leave me a message on Envato.*
